

ACCURATE LUBRICANTS AND METALWORKING FLUIDS, INC.

Lubricants and fluids are industry's lifeline. Smart fluids management is the single most important thing a shop can do to maximize equipment service life, eliminate unscheduled downtime, reduce chemical costs, cut waste – and achieve the highest quality end products.

Acculube provides a broad range of oils, lubricants, coolants and metalworking fluids to the region's OEMs and job shops. We also provide comprehensive fluids testing, analysis and "tank-side" maintenance that maximizes the life of both fluids and machinery by selective filtration, contaminant neutralization and fluids re-balancing. Acculube customers typically achieve a three-or-fourfold increase – (yes, **300 to 400% more!**) – in fluid life using Acculube systems. Costs are low.

Acculube supplies top branded industrial fluids, and the region's most capable tech support. If you use lubricants, coolants, waste treatment chemicals, quenchants, cleaners or other manufacturing fluids, Acculube can provide the tools and systems to boost shop efficiency – and improve your bottom line. Beginning . . . ***right now.***

- Lubricants • Synthetic oil • Synthetic lubricants • Motor oil • Hydraulic oils • Diesel engine oil • Extended life engine coolants
- CJ-4 low sulfur engine oils • Metalworking / Metalforming fluids • Quenchants • Water treatment • Custom Service Program
- Fluid management • Absorbents • Zero-shutdown fluids maintenance • Biodegradable lubricants • Food grade lubricants

Acculube: 403 Homestead Ave. • Dayton, OH 45408 • 937.461.9906

ACCURATE LUBRICANTS AND METALWORKING FLUIDS, INC.

CUSTOM SERVICE PROGRAM

“Our Added-Value Fluid Management Program”

- Provide professional fluids management scaled to your plant
- Allows your operation to continue “24/7” –zero shutdown!
- Maximizes equipment life
- Reduces tool wear
- Lengthens service life of oils, coolants, solvents and other fluids
- Eliminates fluid “emergencies” and unscheduled fluids maintenance
- *Immediately* lowers chemical costs. Can also lower utility (water) bills, if you use large quantities of process water
- *Immediately* eliminates issues of handling, worker health and safety, maintenance training and regulatory documentation
- *Immediately* reduces disposal and environmental costs
- Is customized to your *facility* – no arbitrary minimums or restrictions

Industrial fluids, lubricants and coolants are not only your facility’s lifeline, they’re a powerful **hidden asset**. Properly managed, industrial fluids can be made to be more productive, more predictable **and** an effective tool for immediate, **significant** cost reduction.

Acculube’s Fluid Management Program provides plant-wide, cradle-to-grave management of fluids, lubricants, oils, solvents, cleaners and quenchants. The program includes:

- Lubricant selection and planning, including equipment survey and filtration optimization
- Purchasing and inventory management
- Comprehensive fluids usage monitoring and analysis
- Fluids cleaning, filtration, de-watering and decontamination
- Reclamation, refortification and chemical balancing
- Used oil reclamation, recycling and disposal logistics

Acculube’s Fluid Management program offers comprehensive, expert chemical management, “tank-side,” with no problematical “3000-gallon” minimums. If you use lubricants, ester-based fluids, coolants, oils, solvents, quenchants or EDM fluids, we can show you how to transform these fluids . . . into **liquid assets**.

- Lubricants • Synthetic oil • Synthetic lubricants • Motor oil • Hydraulic oils • Diesel engine oil • Extended life engine coolants
- CJ-4 low sulfur engine oils • Metalworking / Metalforming fluids • Quenchants • Water treatment • Custom Service Program
- Fluid management • Absorbents • Zero-shutdown fluids maintenance • Biodegradable lubricants • Food grade lubricants
