

Lubricants

Hydraulic Fluids & General Plant Lubes

Premium hydraulic oils for conventional and high pressure systems, anti-wear, biodegradable, fire-resistant fluids, gear, bearing and circulating oils, compressor fluids, flush oils and system cleaners.

Greases

For every industrial and automotive application, including high unit pressures, shock loads, high-temp, water contamination.

Machine Tool Lubricants

Spindle oils, slide way lubricants, EDM fluids and full line of food grade products available.

Environmentally Sensitive & Non-zinc Lubricants

Zinc-free and inherently biodegradable hydraulic oils for industrial and mobile and stationary equipment applications in environmentally sensitive locations.

Food Grade Oils & Greases

Hydraulic fluids and gear oils, air compressor and heat transfer oils, white oils, chain and conveyor oil; H-1 and antimicrobial fluids.

Process Oils and Hydrocarbon Chemicals

Solvents and water glycols.

Heavy Duty Truck Lubricants

Conventional and synthetic engine oils, transmission and gear fluids, greases, engine coolants for extended life, DEF diesel exhaust fluid.

Fluid Management

Acculube's Customized Fluid Management Program provides professional fluids management scaled to your plant and designated business plan. Our mutual goal is to maximize equipment life through reduced wear, and to maximize the productive service life of all oils, greases, coolants, and other fluids. We are dedicated to partnering with our customers to find solutions, and to adding value beyond the delivered product.

Metalworking Fluids

Cutting & Grinding Fluids

Soluble, synthetic, semi-synthetic, biostable, straight oil and multi-metal compatible products.

Cleaners

Ultrasonic, spray, high-alkaline multi-purpose; odorless, low residue solvent replacement with multi-metal compatibility.

Coolants

Soluble, synthetic, semi-synthetic, micro-emulsions, fast quench oils, water-based polymers.

Rust Preventatives

In-process and post-production rust preventatives; protection for 3 months to 2 years (indoor or outdoor); products for overseas shipment.

Stamping & Forming

Straight and soluble deformation oils, vanishing oils for stamping, fine blanking, hydroforming. Products for hot and cold rolling.

Vibratory Compounds

Steel and ceramic media compatible compounds, burnishing and micro-finishing products.

Oil Analysis

Acculube's comprehensive Oil Analysis is tailored to the critical indicators in used oil, and is based on specifications from leading equipment manufacturers.

Oil Analysis allows lube managers to monitor the condition of oils in service, whether traditional, semi-synthetic or synthetic, and schedule replenishments or change-outs based on science, rather than calendar date.

The logo for Acculube, featuring the word "acculube" in a stylized, lowercase font. The letters are colored: 'a' is red, 'c' is green, 'u' is blue, 'l' is red, 'u' is green, 'b' is blue, 'e' is red.
